

Prof. Daniel Simberloff

Dr. Daniel Simberloff is the Nancy Gore Hunger Professor of Environmental Studies at the University of Tennessee. He received his A.B. from Harvard University and his Ph.D there (under E.O. Wilson) in 1968. He was a faculty member at Florida State University from 1968 through 1997, when he became the Nancy Gore Hunger Professor of Environmental Studies at the University of Tennessee. His publications center on ecology, biogeography, evolution, and conservation biology, and much of his research focuses on causes and consequences of biological invasions. His research projects are on insects, plants, birds, and mammals. At the University of Tennessee he directs the Institute for Biological Invasions (<http://invasions.bio.utk.edu/resources/index.html>).
